

THE POWER OF LEARNING.

ExxTend Learning™ is OverNite Software's learning management system (LMS). As both an LMS and a learning content management system, ExxTend Learning empowers organizations to administer, track, and report on training, while also providing an avenue to create, import, and deliver the content across their organization.

EXXTEND LEARNING FEATURES

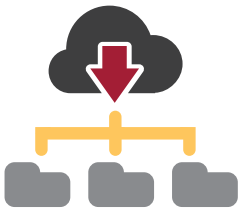

Reporting

The reporting feature is a powerful tool that allows managers to evaluate training compliance, execute organization initiatives, and identify learning gaps. Reports can be exported to browser, PDF, Microsoft® Excel®, or email.

Classroom Manager

This versatile tool allows courses to be used in a blended learning atmosphere, and also enables Administrators to quickly and conveniently credit class attendees with just a few clicks.

Content Delivery

ExxTend Learning content can be delivered in four different learning modes – Test, Learn, Study, and Adaptive. This versatility provides organizations with options for how their employees learn and demonstrate knowledge.

Content Creation

ExxTend Learning has a built-in course authoring tool that provides organizations with the ability to create their own custom courses.

Curriculum Manager

This tool allows the ExxTend Learning Administrator to organize and deliver the curriculum (content) to users in individual or manageable units such as equivalencies, tracks, jobs, groups, or roles.

Third-Party Content

ExxTend Learning has the capability to deliver content from third-party providers such as; uploaded SCORM compliant content, AICC content, HTML and many other options.
